PremiumTower™

PremiumTower™ is a Swiss made 3-phase, online double-conversion Uninterruptible Power Supply.

From **10 to 250kW**, PremiumTower™ provides the best solution for small and medium data center, comms rooms, IT networks and any mission critical application demanding high availability and unbeatable energy efficiency.

PremiumTower™ offers built-in internal batteries from 10 to 60kW minimising the footprint utilisation, eliminating extra costs for external battery frames and avoiding complex installation.

The flexibility in the number of battery blocks (30 to 50) allows the system designer to optimize costs vs autonomy time.

At the same time, the high efficiency of 96.6% in double conversion (VFI) and 99.4% in Ultra-safe ECO mode guarantees maximum energy savings and the lowest Total Cost of Ownership.

Advanced Performance

Unity Power Factor (kVA = kW)

PremiumTower™ provides unity power factor which avoids the need for system oversize to support today's power factor corrected loads.

High Battery Charging Current

With the ability to provide up to 5 times more charging current than typical standalone, PremiumTower™ reduces the total system cost by eliminating the need for external battery chargers.

High Efficiency 96.6% (VFI)

With a best in class efficiency of 96.6% in double conversion mode (VFI), PremiumTower™ provides the lowest Total Cost of Ownership.

Outstanding Overload Capability

With a 124% continuous operation in overload condition, mission critical applications can be safe on the event of unexpected load demands.

Ultra-Safe Eco Mode

With a 99.4% efficiency in Eco mode operation and an ultrafast reaction time of <1.9 ms, Ultra-Safe ECO mode enables an excellent trade-off between power quality and energy efficiency.

Exceptional Short Circuit Capability

With a Short Circuit capability of 3 times nominal current (3 x In), PremiumTower™ is able to clear output circuit protection in milliseconds.

Flexibility and Cost of Ownership

Internal Isolation Transformer

If galvanic isolation, voltage step-up or voltage step-down is required, PremiumTower™ can integrate the transformer within the same UPS increasing the flexibility on system development.

Minimised Footprint

With only 0.28 m² for 10 /20 kW and 0.41 m² for 30/40/60 kW, PremiumTower™ optimises valuable floor space, eliminates the cost of the battery cabinet, and simplifies the installation.

Ease of Service

Direct access to components and plug-and-play internal modules minimise mean time to repair (MTTR) and simplifies routine maintenance.

Matching Battery Cabinets (MBC)

Offering the flexibility to connect different types of batteries while maintaining the same look. PremiumTower™ offers a variety of MBC.

Internal Batteries from 10kW to 60kW

Internal batteries are possible for the whole product range. Up to 160 battery blocks can be fitted in the PremiumTower™, reducing the total footprint and optimising costs.

30^{to}50 Flexible Battery Blocks

Maximum Reliability and Availability

Swiss Quality

Developed and manufactured in Switzerland, PremiumTower™ provides the highest standard of quality in components and manufacturing processes approved by the Swiss made label.

High Reliability by Design

Three independent power converters increase system reliability and provide power continuity even in cases of power component failure.

Distributed Active-Redundant Parallel Architecture (DARA)

PremiumTower™ implements Centiel's DARA parallel architecture with an unlimited number of parallel units to add redundancy and scalability to the system.

Dual Input Feed

PremiumTower™ can be supplied with two independent AC sources to further increase the power availability of the installation.

Communication Features

Output General Alarm Relay

5x Programmable Output Relays

SNMP, ModBus, Modbus over IP

RS232 Port

On Generator Operation

2x Programmable Input Contacts

Temperature sensor for external batteries
